Exchange

Keep safe exchange is a digital marketplace where traders can buy and sell cryptocurrency using different fiat currencies or altcoins. You can trade them using electronic monetary units, fiat currencies, or other digital assets. Dollars, Euros, Pounds, yen and yuan.

When you Trade cryptocurrency via Keep Safe Finance exchange you will enjoy zero trading fees after creating an exchange account, put up the full value of the asset to open position and store the cryptocurrency tokens in your own wallet until you are ready to sell.

Lending

Finance has changed in this new decade. Where just some years ago, gaining access to financial services was limited to a select few, today everyone can benefit from financial services. Keep safe finance is a modern way which will ensures financial inclusion, through providing a line of credit to individuals from all walks of life including; microloan services, cryptocurrency, savings and much more.

The line of credit will be most favored by keep safe finance offerings. This will extend a set amount of money as credit to its customers. With this line of credit, it becomes possible to take out a micro-loan, and pay it back over time with minimal interest.

Customers can begin with a loan worth less than \$20 and borrow in excess of \$5,000 over time. This is an excellent service, enabling financial inclusion for anyone over time. All that is required is to meet the minimum and simple qualification criteria, and you will gain access to an increasing amount of funds over time.

Loan Collateral will be Keep Safe Finance Token (KEF) as you must have KEF token locked to be given loan facility.

Wallet

Keep safe finance wallet is a type of digital wallet used to send and receive cryptocurrency. This is analogous to a physical wallet. However, instead of storing physical currency, the wallet stores the cryptographic information used to access cryptocurrency addresses and send transactions.

Keep safe finance wallet is a digital wallet that allows users to store and manage their wallet with transaction in cryptocurrencies and the ability to convert them back into a user's local currency.

Wallet Features

- Is a digital wallet that allows users to store, manage, and trade their cryptocurrencies.
- Users can manage their balances of KEF, bitcoin, ether, and other crypto assets.
- Wallet charges dynamic fees, meaning that the transaction fees can be different based on factors such as transaction size.
- Wallet has a number of security features to prevent theft.
- E-wallets allow individuals to store cryptocurrencies and other digital assets. In the case of Keep safe finance Wallet, users can manage their balances of various.
- Creating an e-wallet with Keep safe finance is free, and the account setup process is done online. Individuals must provide an email address and password that will be used to manage the account, and the system will send an automated email requesting that the account be verified.
- Once the wallet is created, the user is provided with a Wallet ID, which is a unique identifier similar to a bank account number. Wallet holders can access their e-wallet by logging into the Keep safe finance website, or by downloading and accessing a mobile application.

Online Payment (KOP)

Keepsafefinance token (KEF) offers a secure and cheap way of sending payment that cuts down on the need for verification from third parties and beats processing times for traditional bank transfers. Will be a platform for Buy and Sell wide range of products through payment of Keep Safe Finance Tokens. With the increasing use of the Internet and its popularity, E-commerce is the way to go for almost all businesses. Creating online presence means that the business owner or company can reach potential customers and expand business operations, gaining the necessary authority in the market. It is almost impossible for a company to compete in a highly competitive business world if it does not have a strong online presence, which is the essence of E-business.

Why should you choose Keep Safe Finance ? because will introduce electronic commerce to allow community to have access of buying and selling goods or services through Business to Business (**B2B**), Business to customer (**B2C**), Customer to Customer (**C2C**), Customer to Business (**C2B**).

The major aim is to minimize cost and provide efficient product and service at a right time in such a way to reduce the cost of create process, distribute, retrieve and manage the paper based information by digitizing the information.
